SUMMARY

I'm a web developer with 3+ years of experience in web development as a full-stack developer (MongoDB, Express, React, and Node). I'm Currently looking for a frontend position, ready to relocate to the company's location if it is needed. My mission is not only to work with the world's best-talented people but to learn and create more value to the company by creating simple innovative products and services for everyone around the world.

EXPERIENCE

Freelance Web Developer, Upwork— *freelancer*

Nov 2020 - PRESENT

Designed and created client websites from start to finish using cutting edge web technology and design trends while optimizing content for mobile and cross browser performance.

Personally, consulting clients with design suggestions and hosting recommendations to create designs based on client requests and business needs.

QUALIFICATIONS

- Able to code a single page application (SPA) from scratch using React.JS, the world's best library, with other frameworks like Next.JS, and Tailwind CSS. And other amazing technologies.
- Solid understanding of mobile-first design concepts, cross-browser development, API implementation, and search engine optimization (SEO).
- 5+ years of Copywriting experience grants me the ability to communicate with clients and my fellow talented team to establish the necessary requirement to complete projects professionally and promptly.

EDUCATION

SKILLS

- JavaScript/TypeScript
- ReactJS/NextJS
- HTML 5
- CSS 3/Sass
- Tailwind CSS
- NodeJS
- Redux
- Git
- GraphQL
- SEO

LANGUAGES

Proficient English

Harvard University, Online— Course

Jan 2022 - June 2022

I learned algorithms and how to think algorithmically and solve problems efficiently, so as to develop solutions to engage with the needs of businesses and consumers. And I also learned data structures, encapsulation, resource management, security, and software engineering, which grant me the ability to apply different computer science principles to design cutting-edge web applications that improve the user's productivity and experiences.

Coursera, Online— Course

Oct 2022 - Nov 2022

In order to deliver a better user experience and create more value to the business and customers, I learned React.JS the best library/framework for developing single page apps (SPA) , as well as web accessibility, so that to make sure everyone in the world can access the software in the best way.

In addition to that, I know security is one of the best issues to deal with, so I learned how to improve the security of web apps, by making them less vulnerable using cutting-edge tech.
