SUMMARY

I'm a self-taught web developer with 3+ years of experience in web development as a full-stack developer (MongoDB, Express, React, and Node). I'm Currently looking for a frontend position, and I'm ready to relocate. My mission is not only to work with the world's best-talented people but to learn, and create more value for the company by creating simple innovative products and services for everyone around the world.

EXPERIENCE

FREELANCE WEB DEVELOPER, Upwork— F*reelancer*

Nov-2020-present

designed and created client websites from start to finish using current technologies and design trends while optimizing content for mobile and cross browser performance.

Personally, consulting clients with design suggestions and hosting recommendations to create designs based on client requests and business needs

QUALIFICATIONS

- Able to code a single page application (SPA) from scratch using React.JS, the world's best library, with other frameworks like Next.JS, and Tailwind CSS. And other amazing technologies

- Solid understanding of mobile-first design concepts, cross-browser development, API implementation, and search engine optimization (SEO).

- 5+ years of Copywriting experience grants me the ability to communicate with clients and my fellow talented team to establish the necessary requirement to complete projects professionally and promptly
